How big should your pin be?

Compare six nominal sizes on paper. The circles show diameter; for a custom shape, specify its longest side and confirm both dimensions in the proof.

PRINT AT 100% / ACTUAL SIZE. TURN OFF FIT TO PAGE.

Measure this line with a ruler. Continue only if it measures 50 mm.

50 mm calibration line

Try your artwork at two sizes. Check the smallest text and the details you need to keep. A wider design can still be short: record width and height separately.

These are planning sizes, not a production tolerance. Screen zoom and printer settings can change apparent scale. Confirm the final dimensions with your supplier.
